Inspection and Flushing of the Water Network

Beginning April 18th, 2017, Town of Brome Lake has mandated the company Aqua Data, with the assistance of Public Works employees, to proceed with an inspection and flushing of its water distribution system. This work will take place between 7 am and 5 pm, from Monday to Friday, and will end around May 12th, 2017.

The objective of this work is to clean the water network pipes to improve the quality of the drinking water. The process is to evacuate particles and debris that may form on the walls, thereby increasing the water flow rate and discharge the dirty water through the fire hydrants.

It is possible that this work will cause some turbulence within the network and therefore, temporarily discolor the water by making it reddish without being a health hazard. Note that it is not necessary to boil the water before consuming it during this operation.

The city recommends opening the cold water taps and let them drain until the water become colorless. It also recommends washing laundry after 6 pm.

This work will include verifying the condition of hydrants and street valves, which are both essential to the safety of residents.

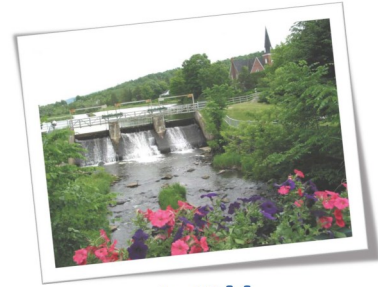

The Town apologizes for any inconvenience caused by the implementation of this work, necessary to maintaining its quality of service and thanks its residents for their usual cooperation.

Revitalisation Project of Downtown Knowlton

PUBLIC CONSULTATION

WEDNESDAY, APRIL 12 AT 6:30 PM
CENTRE LAC-BROME,
270 VICTORIA STREET

FOCUS ON « CŒUR VILLAGEOIS »

Cœurs Villageois

Since the fall of 2016, a committee of 16 people representing various sectors of Downtown Knowlton has been working on a revitalisation strategy of the downtown commercial sector.

The Steering Committee for the "Coeur villageois" file has completed its work and will hold a public consultation on the Action Plan it proposes on April 12 at 6:30 pm at the Centre Lac-Brome. On this occasion, the whole process will be explained, with an emphasis on the delineation of the heart of the Village of TBL, the definition of its distinctive assets and the actions recommended to enhance them. Later, the action plan must be adopted by the Municipal Council so that Tourisme Lac-Brome can benefit from the certification "Cœur villageois" awarded by Tourisme Cantons-de-l'Est.

More than just a certification, this gesture proposes concrete actions to give new life to Downtown Knowlton.

Since citizen participation plays an important role in this process, and we hope to see many of you there!
