Work

Type of work Construction Modification
Category of well Surface Tubular Other : _____
Type of well Residential Commercial Other : _____
Use Personal use Outside uses only Other : _____
Pumping capacity wanted (m³/day): _____
Number of people the well will serve: _____
Type of existing sanitary installations: _____
Does the property border a? Water course Lake Wet land
Flood zone: None 0-20 years recurrence 20-100 years recurrence

Information

Address of work : _____ Lot : _____
Cost of work : _____ Lot #: _____
Date of work : Start : _____ Completion: _____

Documents to be attached:

A plan to scale prepared by a skilled professional showing :

- The building to be serviced;
- The property limitations;
- The existing well(s) (*if sealed, details on the seal must be provided*);
- Water courses, wet lands, lakes, flood zones with the 0-20 years and 20-100 years flood levels;
- Any other physical characteristics of the soil that may affect the location of the underground water catchment installation;
- The distances between the underground catchment installation and :
 - the watertight and non-watertight sewage treatment systems in proximity and which may alter the location of the planned well location
 - other potential sources of contamination such as: a plot in culture, breeding facility, farm operations in proximity, animal manure storage facility, exercise yard, pasture, cemetery, composting area, etc.
- Your future well;
- A construction plan showing all the details of the proposed installation (for underground water catchment and geothermal installations);
- Environmental protection measures.
